Tasks Details

1. MissingInteger

Find the smallest positive integer that does not occur in a given sequence.

Task description

This is a demo task.

Write a function:

class Solution { public int solution(int[] A); }

that, given an array A of N integers, returns the smallest positive integer (greater than 0) that does not occur in A.

For example, given A = [1, 3, 6, 4, 1, 2], the function should return 5.

Given A = [1, 2, 3], the function should return 4.

Given A = [-1, -3], the function should return 1.

Write an efficient algorithm for the following assumptions:

- N is an integer within the range [1..100,000];
- · each element of array A is an integer within the range [-1,000,000..1,000,000].

// you can also use imports, for example: 1 2

// import java.util.*;

3

```
// you can write to stdout for debugging purposes,
    // System.out.println("this is a debug message");
6
    import java.util.*;
7
    class Solution {
       public int solution(int[] A) {
8
9
            Arrays.sort(A);
10
       int min = 1;
        for (int i : A) {
11
         if (i == min) {
  min++;
12
13
14
15
        }
        return min;
16
17
         }
18
```

Analysis summary

The solution obtained perfect score.

Analysis

 $\begin{array}{c} \text{O(N) or} \\ \text{Oetected time complexity:} & \text{O(N *} \\ \text{log(N))} \end{array}$
